

Blue Shield Performance Drug Formulary

Value-based tier drugs

Select Blue Shield pharmacy plans have a value-based tier drug benefit.¹

Value-based tier drugs are specific preventive drugs taken when risk factors are present for a disease that has not manifested (or is asymptomatic), or to prevent the occurrence of a disease from which an individual has recovered.

Value-based tier drugs are select generic and brand-name drugs that are FDA-approved for high blood pressure, high cholesterol, diabetes, and asthma. These drugs are covered at no charge, or at an otherwise reduced member cost share.

The following is a list of value-based tier drugs² used to treat these select chronic conditions. This list is current as of the date printed below and is subject to change. To access the *Blue Shield Performance Drug Formulary*, visit blueshieldca.com/pharmacy.
